Sales

Sales Order Product Line Amounts

This article explains the dollar values for each column and how the amount shown is calculated.

Note Important information About Rounding: All Sales Order Amounts are rounded to the nearest penny. For example, if the Unit Price is 5.255 (note the half penny in the price), and the Ordered Quantity is 15, then the Ordered Amount is (5.255×15.0) = 78.825 Rounded to 78.83

All Sales Order Charge Amounts are also rounded to the nearest penny. When the FOB/Net/Billable Amounts are calculated, they subtract the rounded Charge Amounts. If a Charge has a Unit Rate that goes into fractions of a penny, then the rounded Charge Amount will not be exactly equal to the Charge's Unit Rate * the quantity.

For more information about rounding see <u>Rounding Decimal Amounts in Envio</u> <u>Sales Orders</u>

Ordered Amount - Unit Price multiplied Ordered Quantity, rounded

Ordered FOB Amount - Ordered Amount minus the sum of Ordered Amounts from Charges in the Freight Category

Ordered Net Amount - Ordered Amount minus the sum of Ordered Amounts from Charges in the Net Category

Ordered Billable Amount - Ordered Amount minus the sum of Ordered

Amounts from Charges in the Billable Category Shipped Amount - Unit Price multiplied

Shipped Quantity, rounded Shipped FOB Amount - Shipped Amount minus the sum of

Shipped Amounts from Charges in the Freight Category Shipped Net Amount - Shipped Amount minus the sum of Shipped Amounts from Charges in the Net Category Shipped

Billable Amount - Shipped Amount minus the sum of Shipped Amounts from Charges in the Billable Category Settle Amount - Unit Price multiplied by Settle Quantity, rounded

Settle FOB Amount - Settle Amount minus the sum of Settle Amounts from Charges in the

Freight Category Settle Net Amount - Settle Amount minus the sum of Settle Amounts from Charges in the Net Category

Settle Billable Amount - Settle Amount minus the sum of Settle Amounts from $\Pr_{age \ 1/2}$
