General Information

Understanding Units of Measure

All product lines (Sales Orders, Purchase Orders) have a **QUOM (Quantity Unit of Measure)** and a **PUOM (Price Unit of Measure)**. This allows you, for instance, to purchase product packed by the carton in hundred-weights or in pallet quantities. Example: 22 Totes @ 25.00/CWT.

All Add-on lines (Sales Orders, Purchase Orders) require that the Quantity field and the Price field use the same **UOM (unit of measure)**

Example: An Add-on freight charge for an order of 840 10/5 Balers may be calculated as 1 each @1680.00 each; or it may be calculated as 840 each @2.00 each.
