

# General Information

## I cannot modify my grids. How can I get column chooser so I can modify my grids?

Admin users can activate the ability to modify grids for certain users. If you cannot access a column chooser on your grid, you will need to ask your admin if you can gain access.

### **Admin users grant the ability to change grids:**

Navigate to: Config > User > Double-click Choose 'User Name' > UI Views and Privileges > Company > General > and select **User can Modify Grid Layouts**. Save.

Once the user logs out of EnvioAg and back in, he/she should be able to modify grids.
